Explore our aftermarket carbon fiber parts catalog for the Audi A6 and S6 C8, developed for Audi tuning businesses, distributors, automotive parts retailers and aftermarket brands. Founded in 2006, our factory in China combines manufacturing experience with market insights gained from operating our own direct-to-consumer brand. Our tooling library contains more than 1,500 molds across our overall product range. We understand the importance of distinguishing vehicle versions and equipment specifications when presenting carbon fiber products to trade buyers building an A6 or S6 C8 product offering.

For Audi A6 and S6 C8 wholesale quotations, identify the exact model, year, body style and bumper configuration, then provide the selected item numbers, quantities and delivery country. Confirm the application of each component rather than treating A6 and S6 fitment as interchangeable. For OEM carbon fiber manufacturing, custom development or private label enquiries, submit drawings, reference photos or sample details, material and finish requirements, dimensional specifications, branding needs and estimated order quantities. Contact us to review manufacturing feasibility, tooling, inspection criteria and production terms.
