Source aftermarket carbon fiber parts for the Audi RS6 through our catalog for Audi tuning specialists, distributors, automotive parts retailers and aftermarket brands. Founded in 2006, our factory in China brings together manufacturing experience and first-hand retail knowledge through our own direct-to-consumer brand. With more than 1,500 molds across our overall product range, we offer an established manufacturing background for catalog-product sourcing and custom development enquiries. Our experience with retail customers helps us understand why clear generation-specific fitment, finish specifications and product identification matter to businesses supplying RS6 upgrades.

For Audi RS6 wholesale pricing, provide the vehicle generation, model year, body configuration, catalog item numbers, quantities and delivery country. Include reference photos if the vehicle has modified bumpers or other changes affecting installation. For OEM production or a private label carbon fiber range, submit drawings or sample details, target application, material and finish requirements, dimensional specifications, branding needs and estimated order volume. Contact us to review development feasibility, tooling requirements, inspection criteria, minimum order quantities and production lead times.
