Explore our aftermarket carbon fiber parts catalog for the BMW 2 Series G42, developed for BMW tuning shops, distributors, automotive parts retailers and aftermarket brands. Founded in 2006, our factory in China combines manufacturing experience with practical retail knowledge through our own direct-to-consumer brand. Our tooling library spans more than 1,500 molds across our overall product range. This connection between production and retail helps us understand the product identification, finish expectations and vehicle-specific information that trade customers need when selecting carbon fiber components for G42 customization projects.

For BMW 2 Series G42 wholesale quotations, send the exact model, year, bumper specification, selected catalog item numbers, quantities and delivery country. Confirm the G42 application and identify any conversion involving components intended for another model. For OEM carbon fiber manufacturing, custom development or private label enquiries, provide drawings, reference photos or sample details, target fitment, material and finish specifications, dimensional requirements, branding needs and estimated quantities. Contact us to discuss feasibility, tooling, inspection criteria, minimum order quantities and lead times.
