Explore our aftermarket carbon fiber parts catalog for the BMW M3 G80 and M4 G82, prepared for BMW tuning specialists, distributors, automotive parts retailers and aftermarket brands.

Established in 2006, our factory in China combines carbon fiber manufacturing experience with market insights from operating our own direct-to-consumer brand. Our tooling library includes more than 1,500 molds across our overall product range. This manufacturing and retail background helps us understand the product specifications, finish expectations and application information that trade customers need when sourcing carbon fiber components for M3 and M4 projects.

For BMW M3 G80 and M4 G82 wholesale enquiries, provide the exact model, vehicle year, selected catalog item numbers, quantities and delivery country. Check the application listed for each component rather than assuming that parts fit both models. For OEM carbon fiber manufacturing, custom parts or private label projects, submit drawings, reference photos or sample details, material and finish requirements, dimensional specifications, branding needs and estimated order quantities. Contact us to discuss manufacturing feasibility, tooling, inspection criteria, minimum order quantities and lead times.
