

Explore our aftermarket carbon fiber parts catalog for the Cadillac Escalade, developed for SUV tuning shops, distributors, automotive parts retailers and aftermarket brands. Established in 2006, our factory in China combines carbon fiber manufacturing experience with insights from operating our own direct-to-consumer brand. This connection between production and retail helps us understand the product presentation, customer expectations and after-sales questions that matter to our trade partners. With a tooling library of more than 1,500 molds across our product range, we support existing-product sourcing, custom development enquiries and private label projects.

For Cadillac Escalade wholesale enquiries, send the catalog item numbers, exact vehicle version, model year, quantities and delivery country. Confirm fitment for each selected item rather than assuming compatibility across different generations or body configurations. For OEM carbon fiber manufacturing, provide drawings, reference photos or sample details, material and finish requirements, dimensional tolerances, branding needs and estimated order quantities. Contact us to discuss manufacturing feasibility, tooling, inspection criteria, minimum order quantities and lead times.
