Source aftermarket carbon fiber parts for the Ferrari Roma through our catalog for tuning shops, distributors, automotive parts retailers and aftermarket brands. Established in China in 2006, our factory combines manufacturing experience with insights from developing and operating our own direct-to-consumer brand. Our overall product range is supported by a tooling library of more than 1,500 molds. We understand the importance of communicating material, finish and application details clearly, helping trade buyers define their requirements for catalog products and potential own-brand development projects. For Ferrari Roma wholesale pricing, provide the selected catalog item numbers, vehicle year and body style, quantities, preferred finish and delivery country. Include reference photos for any fitment questions and confirm the application of each product before ordering. For OEM manufacturing, custom carbon fiber components or private label enquiries, submit drawings or sample details, material specifications, dimensional requirements, branding needs and estimated order quantities. Contact us to review development feasibility, tooling, minimum order quantities and lead times.
