14			发动机罩板 Engine hood	W176	DCF

Source aftermarket carbon fiber parts for the Mercedes-Benz A-Class W176 through our catalog for Mercedes tuning specialists, distributors, automotive parts retailers and aftermarket brands. Established in China in 2006, our factory combines carbon fiber manufacturing experience with direct customer insight through our own retail brand. Our tooling library spans more than 1,500 molds across our overall product range. This manufacturing and retail background helps us understand the importance of distinguishing trim and bumper configurations when businesses source carbon fiber components for different W176 customer vehicles.

For Mercedes-Benz A-Class W176 wholesale quotations, send the exact model, year, exterior specification, selected catalog item numbers, quantities and delivery country. Identify any styling conversion or existing modifications and check each product's listed application. For OEM carbon fiber manufacturing, custom components or private label enquiries, provide drawings, reference photos or sample details, material and finish requirements, dimensional specifications, branding needs and estimated order volume. Contact us to review development feasibility, tooling, inspection criteria, minimum order quantities and lead times.
