Review our aftermarket carbon fiber parts catalog for the Mercedes-AMG A45 and A45 S, developed for performance tuning shops, distributors, automotive parts retailers and aftermarket brands. Established in China in 2006, our factory combines production experience with customer insight from operating our own direct-to-consumer brand. Our tooling library spans more than 1,500 molds across our overall product range. We understand that trade buyers need clear generation, version and finish information when sourcing carbon fiber upgrades for A45 customer vehicles or developing their own branded product offering.

For Mercedes-AMG A45 and A45 S wholesale quotations, provide the exact model, generation, year, selected catalog items, quantities and delivery country. Identify the vehicle's exterior specification and check each product's application rather than assuming compatibility between all A45 versions. For custom carbon fiber parts, OEM manufacturing or private label enquiries, submit drawings, reference photos or sample details, material and finish requirements, dimensional specifications, branding needs and expected quantities. Contact us to discuss manufacturing feasibility, tooling, inspection criteria and production terms.
