Explore our aftermarket carbon fiber parts catalog for the Mercedes-AMG CLA35, prepared for Mercedes specialists, tuning shops, distributors and aftermarket brands. Established in 2006, our factory in China combines carbon fiber manufacturing experience with practical knowledge from operating our own direct-to-consumer brand. Our overall product range is supported by a tooling library of more than 1,500 molds. This connection between production and retail helps us understand the importance of accurate product descriptions, defined finishes and body-specific application information when trade customers source CLA35 carbon fiber components.

For Mercedes-AMG CLA35 wholesale enquiries, send the model year, body style, selected catalog item numbers, quantities and delivery country. Specify any facelift configuration or existing aftermarket modifications and confirm the application of each selected component. For OEM carbon fiber manufacturing, custom development or private label projects, provide drawings or sample details, material and finish specifications, dimensional requirements, branding needs and estimated quantities. Contact us to review feasibility, tooling requirements, inspection criteria, minimum order quantities and lead times.
