Review our aftermarket carbon fiber parts catalog for the Porsche 911 991, prepared for Porsche tuning shops, distributors, automotive parts retailers and aftermarket brands. Established in China in 2006, our factory combines carbon fiber manufacturing experience with insights from operating our own direct-to-consumer brand. Our tooling library spans more than 1,500 molds across our overall product range. We understand that businesses sourcing 991 carbon fiber upgrades need clear variant, body-style and product information when selecting components for customer vehicles or developing their own branded offering.

For Porsche 911 991 wholesale quotations, identify the exact variant, model year, body style and exterior configuration, together with the selected catalog items, quantities and delivery country. Specify the 991.1 or 991.2 application and any existing styling conversion. For OEM manufacturing, custom carbon fiber parts or private label projects, submit drawings, reference photos or sample details, material and finish requirements, dimensional specifications, branding needs and estimated quantities. Contact us to review development feasibility, tooling, inspection criteria, minimum order quantities and lead times.
