12			后发动机盖 Engine Lid	992.2	DCF
13			后视镜壳 Rearview mirror housing	992.2	DCF

Review our aftermarket carbon fiber parts catalog covering Porsche 911 992.1 and 992.2 applications. Established in China in 2006, our factory serves tuning shops, automotive parts distributors, retailers and aftermarket brands. We operate our own direct-to-consumer brand and maintain more than 1,500 molds across our overall product range, combining manufacturing experience with practical knowledge of retail product requirements. This combined catalog supports version-specific product selection; inclusion in the same document does not imply that components are interchangeable between 992.1 and 992.2 vehicles.

For wholesale enquiries, specify the 992.1 or 992.2 version, exact model variant, vehicle year, body style, selected items, quantities and delivery country. Include reference photos of relevant installation areas if the application is unclear. For OEM carbon fiber manufacturing or private label development, submit drawings or sample details, target fitment, material and finish specifications, dimensional requirements, branding needs and estimated quantities. Contact us to discuss manufacturing feasibility, tooling, inspection criteria, minimum order quantities and production lead times.
