7			底座 Trunk Lid	992 Topcar	DCF
8			后发动机盖 Engine Lid	992 Topcar	DCF

Review this aftermarket carbon fiber parts catalog for Porsche 911 992 customization projects, prepared for tuning shops, distributors, automotive parts retailers and aftermarket brands.

Established in 2006, our factory in China combines carbon fiber manufacturing experience with market insights from operating our own direct-to-consumer brand. We maintain more than 1,500 molds across our overall product range. Our production and retail background helps us understand the need to identify the exact design, supplied components and vehicle configuration when trade customers source parts for a specific styling project.

For Porsche 911 992 wholesale enquiries, send the selected catalog item numbers, reference photos of the intended design, exact vehicle variant, year, body style, quantities and delivery country. Specify whether the request concerns individual replacement components or a coordinated styling conversion, including details of any existing kit. For OEM carbon fiber manufacturing or private label projects, provide drawings or sample details, material and finish specifications, dimensional requirements, branding needs and estimated quantities. Contact us to discuss manufacturing feasibility, tooling, inspection criteria, minimum order quantities and lead times.
