30			车身风口 Side Air Intakes	992 Turbo S	DCF

Source aftermarket carbon fiber parts for the Porsche 911 992 Turbo S through our catalog for performance tuning specialists, distributors, automotive parts retailers and aftermarket brands. Established in 2006, our factory in China combines carbon fiber manufacturing experience with direct customer insight from operating our own consumer brand. Our tooling library includes more than 1,500 molds across our overall product range. Our manufacturing and retail background helps us understand the clearly specified finishes and vehicle applications that trade partners require when selecting components for Turbo S customer builds.

For Porsche 992 Turbo S wholesale pricing, send the vehicle year, body style, selected catalog item numbers, quantities and delivery country. Specify whether the vehicle retains its original configuration or has an aftermarket conversion, and include photos where fitment requires clarification. For OEM production, custom carbon fiber components or private label projects, provide drawings or sample details, target application, material and finish requirements, dimensional specifications, branding needs and estimated quantities. Contact us to review feasibility, tooling requirements, inspection criteria, minimum order quantities and lead times.
