

Explore our aftermarket carbon fiber parts catalog for the Volkswagen Golf GTI Clubsport, prepared for Volkswagen tuning shops, distributors, automotive parts retailers and aftermarket brands. Established in 2006, our factory in China combines carbon fiber manufacturing experience with market insights from operating our own direct-to-consumer brand. Our tooling library includes more than 1,500 molds across our overall product range. This manufacturing and retail background helps us understand the product specifications, finish expectations and application information that trade customers need when sourcing carbon fiber upgrades.

For Volkswagen Golf GTI Clubsport wholesale enquiries, provide the selected catalog item numbers, vehicle generation, model year, quantities and delivery country. Specify whether the vehicle is an original GTI Clubsport or a standard GTI undergoing a styling conversion, and confirm the listed application of each component. For OEM carbon fiber manufacturing, custom parts or private label projects, submit drawings, reference photos or sample details, material and finish requirements, dimensional specifications, branding needs and estimated order quantities. Contact us to discuss manufacturing feasibility, tooling, inspection criteria, minimum order quantities and lead times.
